GCRIEBER

CONCEPT

SAVING LIVES THROUGH GENERATIONS

Saving life has been the main goal for GC Rieber Compact through generations. All our products are based on this philosophy and have proven invaluable for people in distress. Refugees, sailors and victims of war and natural disasters have been given a new chance with GC Rieber Compact Food.

GC Rieber Compact AS was established in Bergen, Norway in 1948. For 70 years we have provided high quality food products “For Life”.

GC Rieber Compact is part of the GC Rieber Group. Today it is the leading company within the maritime and humanitarian field producing unique food products for malnutrition, maritime survival and preparedness.

Non-Governmental Organizations, United Nations agencies and maritime companies world-wide benefit from the products and services of GC Rieber Compact.

CORE VALUES IN GC RIEBER

Development – that is economic, human and social development – is what continues to drive us.

The balance between economic strength, a robust corporate culture and respect for our surroundings is a key element of our principles.

Our platform is one of long-term business development, exploring new opportunities and stable family ownership. Our value base is one of the key features in our promise to *create value*.

CREATIVITY

We find it stimulating to put the pieces together in a new way, and we dare to question established "truths".

DILIGENCE

We are constantly looking for new opportunities and are working tirelessly to transform the opportunities into tangible results.

RESPONSIBILITY

We go about our business with a strong sense of responsibility towards customers, society, the environment and each other.

CORPORATE SOCIAL RESPONSIBILITY

In GC Rieber, we believe in social responsibility and sustainable development within our entire business operation. We believe that companies can better support international sustainability programs by actively using their know-how and competence to drive economic, environmental and social development through own initiatives and efforts.

”

The company shall treat natural resources with respect, never to be squandered. These resources are to be passed on to future generations in at least as good shape as they were in when we took over.
